STRENGTH

Strong backend development and RESTful API expertise with a focus on scalability and performance. Skilled in solving complex problems, writing clean maintainable code, and adapting quickly to new technologies.

EXPERIENCE

Buzzinga Co

Work Experience : 15/07/2025 to continue

Igeek tech

Work Experience : 1 year+
(10/05/2024) to (30/06/2025)

KeyLogic Infotech

Training Period : 6 months

Work Experience : 1 Year (trainnig not include)
(01/03/2023) to (29/02/2024)

PROJECT

- **Smart Dental Clinic App (AI + SaaS)**

Key Achievements:

- Built AI-powered automatic appointment booking system that reads and processes emails using AI to schedule patients without manual intervention
- Integrated ElevenLabs for AI voice synthesis and Deepgram for real-time speech-to-text, enabling voice-driven patient interactions
- Implemented AI teeth alignment suggestion engine that analyzes patient data and recommends treatment plans
- Integrated Supabase as the backend database and auth platform, and Stripe for subscription-based pricing and payment processing
- Built a complete Inventory Management system with batch and serial number tracking, and automated expiry date alerts for dental products and medicines

- **Forecast-IQ (e-commerce)**

Key Achievements:

- Built AI-powered forecasting system predicting product demand 1-2 months ahead
- Integrated real-time Shopify webhooks for order & inventory tracking
- Developed dual AI chatbots: Admin analytics assistant & Customer support automation
- Implemented vector search using Pinecone for contextual AI understanding
- Reduced manual support workload by 60% through intelligent automation

- **DC Dial (Chrome Extension with Microservices)**

Key Achievements:

- Architected 7-microservice backend system ensuring scalability and optimal performance
- Built role-based access control for Admin, User, and Customer with distinct permissions
- Integrated multiple payment gateways enabling flexible payment processing workflows
- Leveraged AWS SQS and Query Service for asynchronous messaging and efficient data handling
- Implemented OpenAI API for intelligent automation in SMS, email, and call management

- **Car Cover Factory (e-commerce)**

Key Achievements:

- Managed 19 language versions across 18 international markets (14 EU + 4 global sites)
- Implemented multi-currency payment system integrating PayPal, Braintree, and Stripe
- Optimized data retrieval with Redis caching, significantly enhancing client-side performance
- Orchestrated cloud infrastructure with Amazon S3 for seamless image delivery and storage
- Executed digital advertising campaigns across Google Ads, Facebook Ads, and Bing Ads with ROI tracking
